

You need to REJECT NAB's petition 04-160 - I thought I lived in Amreica, the land of the free. Why should XM not be able to broadcast traffic and weather reports I depend on, because other broadcaster feel they will loose listeners? Competition makes America great, why is someone trying to stifle it? The NAB members need to get THEIR programming together - if they didn't have so many commercials and force the same corporate playlist down the throat of all Amreicans, I might be able to tolerate listening to their stations. XM is a great alternative to the corporate wasteland of broadcasters, and it's a service I gladly pay for.
